DETAILED ACTION

Status of Claims

1. Claims 1-4, 6, 10 and 11 were rejected.
2. Claims 1-11 are pending in this application. This action is in response to the applicants' request for a continued examination filed on May 9, 2008.

Withdrawn Rejections/Objections:

3. Applicant is notified that any outstanding rejection/objection that is not expressly maintained in this office action has been withdrawn or rendered moot in view of applicant's amendments and/or remarks.

Election/Restrictions

4. Claims 1-3, 5, 6, 10 and 11 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 4 and 7-9, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on April 30, 2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over

the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claim Rejections - 35 USC § 112, 2nd paragraph

5. Claims 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claim 7 recites the limitation, "A method for treating seeds which...". The claim does not define what it is treating seeds for. Without describing what treatment is being applied to the seeds, it is impossible to determine what "treatment" is taking place. Examiner suggests further defining what type of treatment is taking place with the seeds. No new matter permitted. Appropriate correction is required.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior office action.

Double Patenting

8. Applicant is advised that should claim 6 be found allowable, claim 10 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Subject Matter Free of the Prior Art

9. Claims 1-6, 8, 9 and 11 are free of the prior art.
10. Claims 1-6, 8, and 11 are considered allowable because there is no prior art that describes the 7-aminotriazolopyrimidines of the present invention. The closest prior art is Heimbach et. al.; US Patent No. 2,444,605, however the prior art does not teach the synthesis of a 7-aminotriazolopyrimidine where the corresponding X variable is an alkyl group and the R³ variable is a cycloalkyl or bicycloalkyl group.

Conclusion

11. Claims 7 is rejected.
12. Claim 10 is objected.
